

BASIS MUSEUM-TYPE DUSTCOVERS

Dustcovers of the museum-type are available from Basis Audio for all turntables except the Work of Art. The Basis dustcovers are not merely “museum” in type: the supplier of Basis in fact fabricates covers for museum use.

All panels of Basis dustcovers are machined from full 1/4 inch acrylic stock. The cut and polished parts are bonded together with a permanent solvent-type adhesive, which effectively fuses the panels together as a single piece of acrylic.

The Debut cover, seen in the “Accessories” section of the Basis website, is supported by the four cornerposts of the Debut. All other covers rest on the table on which the turntable sits.

All covers are available in clear acrylic to best display the incredible fit and finish of Basis turntables and tonearms.
